

# DryRod®

## PRODUCT DESIGN IMPROVEMENTS

### DryRod® Ovens: A Long-Term Investment

- Heating elements outlast competition
- Durable steel exterior withstands field abuse
- Quick replacement of locking cord
- Complete range of repair part kits available

### Design Improvements

#1

**Problem:** Power cord loosens from the power inlet resulting in power loss and heat reduction.

**Solution:** Utilize a removable locking cord. A locking power inlet and cord combination provides a secure connection and withstands 65lbs (30kg) of force.

#2

**Problem:** Type 1 ovens sustained lid and hinge damage during shipping.

**Solution:** UPS tested packaging withstands eight drops from 10 feet (3m).

### Locking Power Connection Kit

Part #1257395

**Purchase a Locking Power Connection Kit to retrofit existing DryRod® II ovens.**

Usable on all Phoenix portable DryRod® II ovens

Includes:

- 1 - Locking power inlet
- 1 - Locking power cord
- 2 - Rivets

**COMING IN 2010:**  
Hinge and Lid Assembly Improvements!
